

The Bass River Township Planning/Zoning Board is looking to hear from township residents or business owners that have been adversely affected by owning property in the "Pinelands".

We understand that there have been issues where applications were either denied or delayed due to having to go through the Pinelands Commission for approval.

We are trying to compile a list to show how this is a negative impact and causes a financial strain for the people of this town and Bass River Township in general.

We would like details and paperwork to back up the claims so that we can properly present a case to The Pinelands Commission.

Please submit your information to us by September 16, 2019. Email, US mail or bringing the information in to the office are all acceptable ways to get us the documentation. There is also a drop box by the Tax Office door at the Municipal building if you come after hours.

Thank you.
